PROJECTS

Insta Chef - Admin Pannel Development

- Developed the admin panel for *Insta Chef*, a platform that connects professional chefs with households for in-home cooking services. Built a user-friendly dashboard using **HTML, CSS, and JavaScript** to manage chef bookings, customer requests, payments, and real-time status updates, ensuring seamless platform operations.

Emreeprep - Front-End Development

- Worked as a Front-End Web Developer on the **Emreeprep** website, an educational platform designed to support exam preparation and learning resources. I was responsible for building responsive and accessible user interfaces using **HTML, CSS, JavaScript**. Actively contributed to the deployment of production-ready features and maintained code versioning using **Git**.

Madwolfrides - Frontend Development

- Contributed to the design and development of **MadWolfRides.com**, a motorcycle rental and touring platform, focused on providing users with an engaging and responsive booking experience. Developed key front-end features using **HTML, CSS, JavaScript**, and ensured **mobile responsiveness** using **media queries**. Collaborated with the backend team to integrate dynamic content and optimize performance. Employed **GitHub** for version control and contributed to UI improvements that enhanced the overall user experience.

INTERNSHIP

Full Stack Developer (Modi Software Solutions Pvt. Ltd.) (02/2024 - 06/2024)

Built a fully functional online platform for selling indoor and outdoor plants. The website allows users to browse plant collections, add items to cart, manage orders, and contact support—all through a modern, responsive UI.
